

PYLOGUARD™

PyloGuard™ is a dietary supplement designed to support the body's natural processes for elimination. It contains patented *Lactobacillus reuteri* DSM17648, which can attract specific organisms in the intestine and support their removal via the digestive tract. This particular strain of *L. reuteri* specifically binds to *H. pylori* in the stomach and supports overall digestive health.

KEY BENEFITS

Supports bacteria levels in the stomach

Promotes the body's process of elimination

Supports the microbiome

Maintains *H pylori* levels already within the normal range

KEY FEATURES

- ✓ *Lactobacillus reuteri* DSM17648 culture containing $\geq 1 \times 10^{11}$ inactivated cells/gram
- ✓ Produced in a low-temperature fermentation & drying process to avoid denaturing
- ✓ Stable under the gastric conditions
- ✓ Doesn't disturb the gut microbial balance
- ✓ Formulated in a free-flowing, spray-dried powder format
- ✓ Stable at room temperature
- ✓ Backed by *in vitro* and *in vivo* scientific research
- ✓ Safe for long-term daily use (QPS, MIC, GRAS)
- ✓ Produced and tested to exceed the most stringent EU quality standards (ISO)
- ✓ Free from GMO, gluten, lactose, and fructose

WHAT IS HELICOBACTER PYLORI?

Helicobacter pylori (*H. pylori*) is a gram-negative, spiral-shaped bacterium native to the human gastrointestinal (GI) tract. It has an affinity for the acidic environment of the gastric mucosa. Estimates say that up to 50% of the world's population carries *H. pylori* in their GI tracts. *H. pylori* is spread through direct contact with individuals or household pets through saliva, feces, or contaminated food or water.¹⁻³

Humanity's relationship with *H. pylori* is ambiguous. *H. pylori* can have a commensal or symbiotic relationship with its human host.

H. pylori colonizes and multiplies in the duodenum and gastric mucosa, secreting urease, the enzyme that converts urea to ammonia. Alkaline ammonia buffers the naturally low pH of the stomach, providing the optimal environment for *H. pylori* to live.^{4,5}

DISRUPTION OF THE MICROBIOME CAN CAUSE OCCASIONAL:⁶

Nausea

Heartburn

Loss of appetite

Dyspepsia

SUPPLEMENT FACTS

Serving Size 1 Capsule
Servings Per Container 30

Amount Per Serving	% Daily Value
<i>Limosilactobacillus reuteri</i> 300 mg †	
DSM 17648	40 Billion Cells

† Daily value not established.

Other Ingredients: Natural Flavors, Vegetarian Capsule (Cellulose, Water), Acacia Fiber, Monk Fruit Extract.

SUGGESTED USE

Ages 3+: Open 1 capsule into 8 oz of water and drink once daily on an empty stomach. Children under the age of 3, please consult your healthcare practitioner.

Pour

Stir

Enjoy
