

Total Gut Restoration™

A Gut Health Restoration Protocol
From Microbiome Labs, Makers of
MegaSporeBiotic

3 Months of Total Gut Restoration

Total Gut Restoration (TGR) is an advanced 3-month protocol to support and restore gut health. A triple-dose of three unique supplements works to support a healthy gut, including maintaining a healthy and harmonious microbial ecosystem, promoting a protective gut barrier and supplying precision bacterial species that support balanced immune and digestive function. Indeed, a healthy gut is a necessary foundation for supporting a healthy immune system.

Therapies that address only one aspect of gut health are often ineffective. This gut transformation system is supported by science, clinical practice and patient preference.
